THE FORCE 360 LINE

The patent pending, master engineered JTL Force 360 line has incorporated the skid and legs into a very efficient and effective aeration system that give the bins a superior advantage.

EVEN AIR DISTRIBUTION SYSTEM

Mounted on a broader, one piece skid, the fan draws air into the skid, pushes it up the legs and into the bin through a series of outlets strategically placed along the face of the cone. PAMI (Prairie Agriculture Machinery Institute) reporting shows a very uniform flow of air through the entire bin. By incorporating the existing infrastructure of the bin into the aeration system we have been able to eliminate some of the costs and inconveniences associated with more traditional aeration systems.

This wider skid formation is an excellent plenum for the aeration system, while providing a more stable foundation for the bin to stand on.

**Designed for FARMERS,
by FARMERS.**

Our design team at JTL Industries is made up of farmers. The ideas we incorporate into our products are based on years of hands-on experience, giving us an inside advantage.
