

Anchor 1 Angus

4th Annual Bull Sale

Saturday, April 9, 2011
Sale Time: 2:00 pm

At The Geinger Farm
South of Mayerthorpe

Greetings Friends and Fellow Cattlemen,

If I'm going to begin, with the most pressing thought in my brain right now, I have to say one of the major television networks should be contacting our industry, any time now, asking about doing a reality series called "Survivor Ain't Got Nothing On Us!" Eight years of severely depressed markets and now the coldest calving season since the middle of the last ice age. I truly do believe those of us who did survive may have finally hit the jackpot. And I have a good feeling we're going to be sitting in the driver's seat for several years into the future.

Before we acquired our purebred red angus herd we had been using red angus sires exclusively on our 450 head mixed commercial herd because we loved how they crossed with any other breed, the maternal traits were so good, and the calving ease and low maintenance calves significantly lowered the labor requirements at calving so calving that many females was manageable and not too hard on the marriage. As we sold off our commercial cows, as cow/calf pairs, our females did command quite a premium so several buyers would only buy a small package of our cows and offset the cost by buying some other cheaper cattle. Pretty well every one of those folks have since contacted us saying they wished they had spent the extra money and bought more cows from us. And the interest in our culled replacement heifers this spring has been extremely gratifying.

The Royal Valley herd of registered females, we purchased in 2007, which is still the main bloodline in the Anchor 1 program, are extremely sound, quiet, maternal females with unbelievable longevity- not to mention one of the most decorated red angus herds in Alberta. I would bet you would not find another herd, of any breed, with 55 cows calving this season at ten years old and older (22- 13 years plus and one at 18). And most of those cows look like they could be six. And those same genetics remain strong in our entire female herd.

We understand many farmers like to use red angus sires on their heifers or second calvers, for the calving ease and low maintenance, but know from experience using the red angus power bulls on your cows will leave you a set of both feeder steers and replacement heifers that you, and your potential buyers, will love. And carcass and consumer statistics have shown that angus beef really is the best.

We believe this is the best set of bulls we have ever had to offer, both calving ease and power, stand behind our promise that you will be extremely pleased with the calves they will leave you. We are extremely excited about the future of our program as we strive to offer more power bulls, while maintaining our strong heifer bull offering, as we know, once you try one of the cow bulls on your cows, you'll be beating down the door to try another. And we are excited about our industry as a whole. Pat yourselves on the back gentlemen (and ladies) because it hasn't been an easy ride, but I think we've finally arrived at our desired destination. The future truly is ours.

Ralph & Karen Geinger & Family
Kyle, Kevin, Amanda, Tenielle

Looking forward to seeing you all soon,
The Geingers.

Video Auction Sale

In an effort to Make things as easy as possible for us hosting the Sale and to facilitate the viewing of the bulls with out a full sale facility we have decided to Run the Video Sale again this Year. For the Sale the Video clip will play on the big screen as the bulls are sold. This sale format was very successfully last year and at other operations and we feel that is the best way to keep stress low on the cattle. Basically the only difference from a traditional bull sale is that the cattle will not physically walk through the sale ring. The bulls will be displayed at the Bull farm just ½ a mile away. This will allow you to view the bulls prior to the sale and then come up to the hall for lunch and the sale. If you have any questions about the sale format please give us a phone call.

Expected Progeny Differences (EPDs)

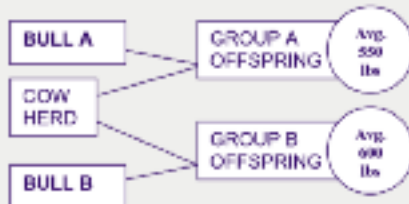

Statistics generated for individual cattle through national genetic evaluations.

EPDs evaluate group averages and offspring's performance. They cannot predict individual performance or weights.

For example, if Bull A (weaning weight EPD of +10) and Bull B (WW of +80) were randomly mated with ten similar cows, we would expect the group average weaning weight of Bull A's offspring to be 50 lbs lighter than that of Bull B's (50-10=60).

Calf	A	B
1	500	400
2	510	450
3	520	500
4	530	550
5	540	600
6	550	650
7	570	650
8	560	700
9	590	750
10	600	800
Avg.	550	680

Note that not all calves from Bull B have a higher weaning weight, but the average is 30 lbs higher.

Accuracy—reflects the reliability of the EPD value. High accuracy values (> .80) mean the EPD value is closer to the true breeding value than an EPD value with a lower accuracy (< .20).

EPDs:

- ☑ allow breeders to estimate a young animal's breeding value—that animal's value as a parent
- ☑ allow a fair comparison of breeding value by removing environmental bias such as climate, feed and special management
- ☑ the best tool available to compare animals between herds, countries and year of birth
- ☑ help breeders make informed decisions regarding breeding stock selection by evaluating numerous traits such as growth-related traits (BW, WW, YW, MIK), carcass (REA, FAT, %IMF, etc.) and reproductive efficiency (CE, MCE, SC)
- ☑ estimate the group performance of one parent compared to the group performance of another parent, assuming similar mates

To evaluate seed stock, use EPDs, pedigree and visual assessment. With EPDs, the concept of "intermediate optimums" works best. Selection for one trait or for extremes generally results in unexpected consequences due to genetic correlations—for example, intense selection for high yearling weight will also increase birth weight. Successful cattle breeding requires a thoughtful and balanced approach to optimize fertility, growth and carcass merit while improving profitability and efficiency.

Calving Ease Scores

Recommended for all heifers

Recommended for larger heifers/ 2nd calvers

Recommended for cows

Health & Fertility:

All bulls will have a scrotal measurement, vet examination and have passed a Semen Test prior to the sale. All Veterinary Work will be completed by Mayerthorpe Vet Clinic - Dr. Claire Ainsworth

100% Guarantee:

All bulls are guaranteed to be satisfactory breeders in accordance with CAA guidelines. Should a problem occur barring physical injury or mismanagement, a bull of equal value will be provided or a credit will be issued towards the purchase of another bull. We guarantee you will have a bull to service your cows.

Bull Development & Delivery:

Option A:

Bulls can be picked up at Anchor 1 on sale day and a \$50 discount will be deducted from purchase price.

Option B:

At the buyers option and risk, the bulls can stay at Anchor 1 and will be delivered with in 250 KM of Mayerthorpe. We will do our utmost to deliver them right to your yard. This will be done at the convience of Anchor 1.

Option C:

Anchor 1 will keep the bulls free of charge until May 1st. At this time the buyer must pick up Bull From the Farm.

**ALL BULLS STAYING AT ANCHOR 1
MUST BE INSURED.**

Double bred to calving ease breed legend Ole's Oscar we thought we were keeping a calving ease bull when we kept this guy but what we got was a power bull with extreme muscle and style. Hitch does throw a little birth into his calves but we have never assisted any calves with birth or sucking. His calves remind me of the exotic bred calves we used to have on our old commercial cows- just a little more stylish and a whole lot smarter.

This guy has been a standout from the beginning. With this being our first group of Hitch 52T sons we have ever sold we are very pleased with what he has produced. They are very uniform, with lots of hip, nuts and guts and to top it all off they are extremely muscular. This guy has the look and swagger of a herd sire and he is our Number 1 Pick of the Hitch Sons. Come check this fine fellow out sale day.
Retain in herd Semen use interest.

This guy is out of a 13 year old cow that is extremely sound and phenotypically correct. He is a very showy, cherry red Bull with a great foot under him. Although this guy has a fairly moderate birth weight of 88lbs, we would not recommend using him on heifers, but second calvers or older should be just fine.

Our bull pen here at Anchor 1 Angus starts out with 180 bulls in the pen and we only want to sell the best of the best so we thin that all the way down to 65 bulls. So when a bull raised on a first calf heifer is good enough to make that cut you know she is gonna be one heck of a good cow. Pretty darn good calf here.

In the 4 years that we have been in the Bull raising business, we have not yet seen a first calf heifer raise a bull that is as complete all the way through as this guy. Look at the numbers on this guy with just an 80lb. birth weight and a 739lb-205 day weight this guy could be pretty darn special. Herd Sire potential for sure here.

Best word to describe Beef- consistency. Extremely easy moving bull that could probably service 80 cows if he had to- this guy simply gets the job done. Uniform birth weights with great performance, this fellows calves are peas in a pod. When we changed their tags to lot tags we couldn't tell them apart- every calf possessing the same traits we admire in him.

Not too bad for his dams 97U's 1st. attempt. The wonderful thing about these Knight 43R calves is that when you are out watching the cows and it is the middle of the night and a cow or a heifer starts calving that is bred to Knight we just put her in the barn and go back to sleep. They are born so fast and the calves have so much get up and go that they are basically maintenance free. Nice little heifer bull here.

This is one bull that may have more than any other truly exceeded our expectations. He started out just an average bull and now the only way to describe him is absolutely correct in his make up. He is Dark Red, Moderate Birth, Smooth made and his feet are out of this world Good. Recommended for use on Cows. Take this guy home sale day and he will impress you with several years of good quality offspring.

Here we have the 2nd. heaviest bull in our entire Pen, but what is even more impressive than that is the fact that he is the #1 Weight Gaining Bull this year at a rate of 3.32lbs. per day. He is an exceptionally solid made bull with Great Feet. He truly is outstanding and we guarantee he will leave you with a great set of calves Year after Year.

This is hands down Our Best Set of Royal Valley 210S calves that we have ever raised. And it just so happens to be the last as we sold Value 210S this past Fall. The Reason this set of Value calves are so special is because of the incredible set of cows he bred last year and this guys mother is second to none, absolutely Flawless. This bull truly is the right kind and he will meet your every expectation.

Jackpot is built like a train, long bodied, wide set and very heavy. In fact he was the Heaviest Bull we weaned last fall and he was still the Heaviest Bull at a year old. This guy truly is an outstanding calf that you would have to see to believe. Take a look at him and his numbers and then think about the set of calves he will produce in the future. We really hit the Jackpot with this Guy.

Here we have the maternal brother to our High Selling Yearling Bull, in last years sale that was bought by, our neighbors and good friends, The Callioux Family. He is a very sharp front ended Bull with lots of shape to him. The mother of this bull is Gorgeous and Consistent. She raises a fantastic calf every year. We recommend the use of this guy on cows.

It's nice when bulls give you a consistent birth weight on these set of calves, but it's also nice when a Bull like Value 210S gives you sure bet Heifer Bulls and Power house Cow Bulls. If his calves are born under 85lbs. they are so smooth fronted and built to calve easy. When his calves are born over 85lbs., they are big boned and heavily muscled. This guy at 77lbs. would be just what your heifers ordered.

All about style and structure, this dark red, tremendous footed, extremely eye appealing bull was a favorite of ours from the day we bought him. Purchased from us last spring by Rob and Terry Adams at Ter Ron Farms- who must know a little bit about great herd sires, as they usually take home everything but the kitchen sink at every show there is, this will be the last offering of his sons at Anchor 1. We're going to miss old Duke but he's got a lot of daughters still here at the farm.

Here we have a tremendously showy calf that is dark Red, Sharp footed and very easy on the eyes. With Fully Loaded and Oles Oscar in his pedigree this moderate birth, calving ease phenomenon is full of potential.

When we chose to keep 29U, for our own in herd use, we thought we were keeping an extremely stylish power bull with a great dam. We were only partly right. He was only exposed to 5 cows in 09 but they are 5 of our best calves (two bulls in the sale and 3 heifers in the replacement pen. What we didn't expect was his absolutely "no miss" calving ease on heifers. On probably 50 plus heifers (2010 and 11) he has averaged about 75 pounds and those calves know how to grow. Look for a lot more of his progeny in future sales.

Charger is a meat machine. He is long bodied and thick all the way through. His Sire In Charge 29U has a birth weight of 95lbs. and he consistently throws calves in the 70-80 lbs. birth weight range. These will be the first 2 In Charge 29U Sons we have ever sold, but there will be many more in the years to come. Charger will certainly attract some attention on Sale Day jump the gun and be the 1st. one to own 1 of these outstanding In Charge Sons.

278X is a nicely made Twin Calf, that was raised by himself on his real mother. We truly are impressed with the big bone structure that these In Charge calves develop, especially since they are born at an average birth weight somewhere in the mid seventy pound range. They are good footed and maintain an extremely thick Cherry Red Hair Coat. Take a good look at the picture of this guys Sire and that will give you an idea of what he will look like when he is all grown up.

Dark haired, tremendous footed, extremely eye appealing son of old One Iron this guy is a calving ease supreme. Used exclusively on heifers this guy has left some unbelievably beautiful replacement females and his calves are consistently strong and almost always sucking in less than one hour. We're sure you'll be seeing a lot more sons from this guy featured in future sales.

Do any of you by chance remember the bull Red Royal Wrangler 30Y? Well if you don't that's okay, because he has been deceased for quite some time now, but we managed to dust off an old straw of semen and we implanted it into 203S and we ended up with this handsome fellow. 107X is a very complete, hairy, good footed bull whose Sire many years ago brought home some major hardware whenever he took a trip to the show ring. Heifer Bull Material here.

Here we have our only Oles Oscar Son on offer this year and he is a Power House. He started out at 95lbs. and from there he ranked 5th. heaviest in our entire pen in Weaning Weight and 4th overall in Yearling Weight and to top it all off he was the 3rd. best Gainer in the group. He is certainly the right kind of bull and he will probably turn some heads his way on Sale Day.

About the Two Year Olds

We are excited to offer this impressive set of two year olds at the sale again this year. These two year olds are only being fed a silage/straw ration, like our herd sires, with a little oats to offset the lower energy "straw", and we know you'll be impressed at the thickness in all of them despite the high roughage ration. These guys are ready to breed a lot of females for you this year. If you are a little short on bull power and need one bull to cover more cows, don't miss these guys sale day. If this is what all the bulls raised here at Anchor 1 grow into, we certainly believe we're doing something right!

Full brother to \$6,000 herd sire sold in 2007 to Grant and Ray Chittick. Tremendous thickness and eye appeal, sure bet calving ease and tremendous performance. Used as a cleanup bull on our last year's AI cows and his calves look great. 68R is a beautiful female who never misses raising one of the top calves in the pen. Don't miss this definite herd sire prospect on sale day.

Maternal brother to our herd sire In Charge 29U who is proving to be one hell of a bull. This guy would be a great choice if you have never used a red angus bull on your cows but want to try one. We very rarely ever touch the chains here at calving time (calving out 450 to 500 females- 80 to 90 of them heifers) and these red calves are all born practically standing and ready to suck.

Another great choice for guys who like to use the same bull on their cows and heifers as this 73R son combines calving ease and performance. Out of another tremendously eye appealing 11 year old (in 2009) Royal Valley cow.

Watch for Sons from these new Herdsires Next Year.

Red Anchor 1 Commander 207W

Red Blair's Phenom 210W

Many thanks to our workers throughout the past year Shane, Martin, Cole, Cory, Tyler, William and Coltan. Thanks to the crew who helped us sale day last year both at the bull pens and at the hall. Thanks Trevor Rodney, Jason and Wesley for getting our panels organized. We really appreciate the help and support of our friends and family you are awesome. Thank you! Thank you!

TERMS & CONDITIONS

TERMS - The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made previous to the sale. The right of property shall not pass until after settlement is made.

BID - Every animal consigned to the sale must be sold by auction. No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted. Each animal will be sold to the highest bidder.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable time.

ANNOUNCEMENTS from the auction block will take precedence over printed matter in the catalogue. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY - The proper Registration or Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after settlement has been made.

SHIPPING - Assistance will be given in making shipment after the sale but no risk is assumed by Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

GUARANTEE - All animals will carry standard breeding guarantee as specified by the Canadian Angus Association. At no time shall the seller's liability exceed the purchased price of the animal.

EXCEPTION TO GUARANTEE - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.

RIGHTS AND OBLIGATIONS - The above terms and conditions of the sale shall constitute a contract between the buyer and the seller and be equally binding to both. Resale of animals following purchase in this sale shall constitute a separate transaction and the rights and obligations of the two parties connected thereto are not covered by the terms and conditions of this sale.
