Note ringman no longer the same as last year

Welcome

We'd like to welcome you to our 2018 sale. There's a mix of fullbloods, purebreds and a few black purebreds. This year we are selling open heifers, mature cows and three bulls.

We hope you will support this sale as red/white Maines have almost become extinct, sad to say, yet each year we have several new people, including breeders, wanting the true line of Maines.

Hope to hear from you,
Gary and Sandy Graham

TERMS AND CONDITIONS

Payment by cheque or cash payable sale day unless otherwise agreed upon. Payment in Canadian funds. American exchange will be .80 U.S. Payment to sale clerk before cattle released. All cattle will be sold to highest bidder. The auctioneer has final say in all aspects or any disputed bid which would be reopened to bidders in question. If no further bid the buyer will be the person from whom the auctioneer took the last bid. Any announcement from the auction block will take precedence over any printed matter in catalogue. Each animal becomes the risk of the purchaser as soon as sold. Insurance available sale day. Required health certificates for export cattle will be provided.

Cattle purchased by U.S. buyers will be arranged to be trucked to Belle Fouche, South Dakota in Mid December and meet Lathrop Trucking.

This heifer is what lots of cattlemen have looked for. She could be the dam of good heifer bulls. Very moderate correct and feminine. Only a 50 lb. birth weight and no more. Comes from Cowboy Up which was a great heifer bull. Could be a super show cow. Born February 18th from a tremendous heifer.

BW of 75 lbs. Polled. Gotta love this one. She is a black sired by a fullblood bull as her dam's grand dam and great grand dam go back to Belted Galloway. This is so typical of the recessive color in our fullblood bulls where buyers so often have no clue that calves they buy are sired by Maine bulls.

Never had any black bull buyers this year. This bull was too good to ship. Is horned from fullblood sire, dam is from a fullblood also and grandam has fullblood breeding as well. This is the genetics black Maine breeders need to use. 105 lb. birth weight, semen tested 40.5 last spring.

BW of 120 lbs. Here is a rare find when you consider the new sire from France and this cow line. Long calf at birth, had to rip him out of sack as she calved so quickly. The spaghetti cattle are big and are good, this will be a great herdsire.

BW of 110 lbs. Commercial. Here is a true 50% , a Piedmontese with a fullblood Maine heifer. Where do you find these? Will be a super good cow.

MANITOUS MS 54E

MANITOUS MS 54E

36 CHAROLAIS X MAINE BRED HEIFERS

Five Charolais/Maine commercial breds. All from our cows. Sold these five last year in our sale then the buyer baled afterwards. They are AI'd to a Luing bull for mid February then exposed to polled fullblood 65 lb. birth weight bull. Certainly something different. Would be interested in buying back any Luing heifer calves.
