BUILDING GENERATIONS OF HIGHLY FUNCTIONAL, LOW MAINTENANCE ANGUS CATTLE WITH STYLE,

Browarny

Our herd of easy fleshing, hard working momma cows originated from th
exceptional calving ease, curve bending growth and outstanding carca

PERFORMANCE & CARCASS QUALITY

ne famous Boot Jack Ranch in Montana. There, they were developed for
ass quality with minimal inputs – principles we still hold true to today.

WELCOME TO OUR NINTH ANNUAL BULL SALE

Welcome to our 9th annual Bull Sale! TWO Names with ONE Program! Aspen Hill and Heart Valley Angus!

I would like to thank everyone that supported our sale last year and helped to make it great success. I truly hope that those bulls worked great for all of you. If they did, tell your friends and if not, please tell us. We do care, and we do our best to make sure you are a satisfied customer with both our site unseen or on-site purchases.

Every year we have had questions about why the different breeder names on the bulls. To clarify this, yes, there are different names, but it is the same herd. In the breeding, performance and herd program, they are all one in the same. Two Names – One Program. That's it. The entire group that you see here in this catalogue AND the entire herd of breeding stock that we manage (cows, bulls and calves) are all physically managed as ONE herd. I am proud to be the one responsible for the breeding program and of what my wife Kelly and I have achieved so far over the last 30 years. Together with Heart Valley Angus, we are continuing to produce the quality of cattle that Aspen Hill started so many years ago with the coaching of Cliff and Audrey Haugen of Boot Jack Ranch. The entire herd is bred, calved, weaned, fed and pastured with a breeding program that includes the whole group, Heart Valley and Aspen Hill. And we continue to work together to bring you, our customer, the best product the Angus breed can provide.

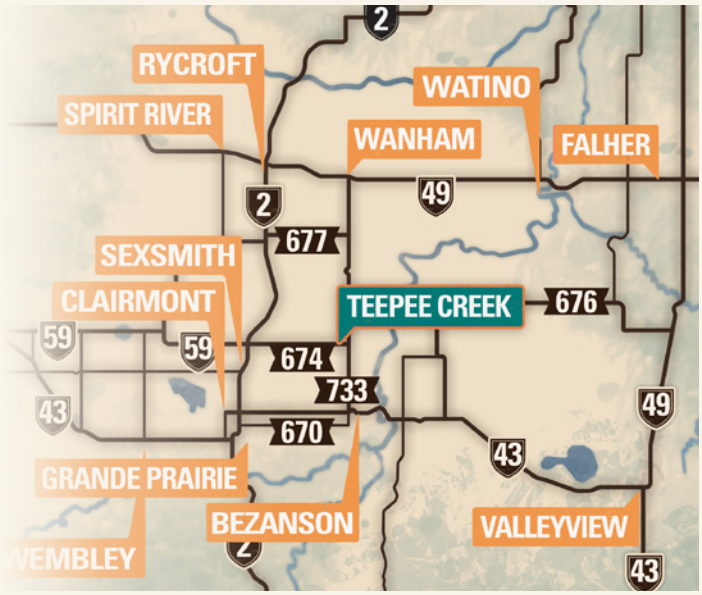

We do not sell yearling bulls. These are the very top of our crop, every year I seem to be able to say that this may very well be the best set of sale bulls that we have produced so far. Every year I get some incredible compliments at our sale. For the past few years at least 1 or 2 people tell me that our set of bulls is as powerful looking as any set of bulls that they have ever seen but never from just one breeder. The bulls will be available for viewing on Wednesday evening. Everyone is invited to stop by to do their homework as these bulls are very uniform throughout. On sale day it is very difficult to bring bulls out for a better look in the alley. This Wednesday night viewing has been growing, making for some great socializing as well.

We have been following our product for years and the feedback in the quality of calves from birth to the feed lot is incredible. The Commercial calves shipped from our program have been doing exceptional. They finish in a very short period of 14 -15 months of age and have been grading well above industry average. With over 80% Prime/AAA and over 60% yield and not going over 70% barley on their feed ration to achieve it. Check out carcass Grading Benchmark Chart on page 6.

As we do listen to all feedback from our customers, we have decided to change the feed ration on our SALE BULLS. Every year I get told "No way these bulls are only fed what you say." Well, we just turned them down some more as some of our feedback indicates that in some areas our bulls are losing a bit more condition while working than what we would like. Now they are on free choice hay and 30 lb silage and 10 lb oats per day. As we all know these sires need to be in great shape to perform their job and can't do it if in the wrong condition. We don't feel we were very far off but just giving them as small tweak. We know we could put more lbs on them but we choose not to as they are in great shape and NOT BURNT! These guys have very dominant genetics and will improve your calf crop in one cross. Muscle makes money, bottom line.

I can never say enough about the great birth weights on these bulls. For over 30 years now, we have used no herd bulls that had over a 90 lb BW and they must be very close or over 3 lbs/day gain with exceptional carcass. The bulls all have medium and very correct bone structure, and they need to walk effortless and true. All bulls don't have the same performance but all of them are very correct and have lots to offer. The balance and uniformity on this set of bulls is great. There is no question that our program is working and getting better every year.

Sincerely,
George LeBlanc

EPDs versus Index I thought I would take some time to explain the difference between EPDs and indexes as I get asked about it every year. EPDs are breed-wide and indexes are calculated on in-herd performance only. For example, a bull with a 110 weaning weight index would have gained 10% above average and a bull with a 97 weaning weight Index would have gained 3% below average, 100 Index being average. Feel free to ask questions if something isn't clear, as we want to help in any way possible.

EPDs are useful tools when planning breeding programs. Attention should be paid to the heritability and correlations to the traits a breeder wants to improve upon within the herd. Some traits are more heritable than others resulting in faster progress being made in comparison to other less heritable traits. Also, many traits are correlated, wherein the trait is affected by the expression of several other traits. It is important to be aware of such logistics when developing selection criteria in a breeding program.

Understanding the heritability and the effects of correlation between traits will aid in developing a genetic selection program that will optimize improvement on desired traits while minimizing undesirable side effects.

Trait	Heritability Range	Level
Reproductive	less than 0.20	low
Growth	0.20 to 0.40	moderate
Carcass	greater than 0.40	high

How to use EPDs in Sire Selection

Each individual breeder must set his own selection goals based on the needs of his operation, the situation for that trait in his herd, and his production environment.

It would be easier if we could assume that the highest EPDs are the best. Unfortunately, it isn't that simple. Like most decisions, using EPDs for sire selection involves tradeoffs. For example, bulls with high growth EPDs may sire calves with a higher birth weight as well. And there may be other impacts on your operation to consider.

For example, when breeding heifers it is desirable to produce calves with lower birth weights, so a breeder may want to pay special attention to birth weight EPDs of prospective bulls. If all calves were sold as feeders, the milk EPD would generally not rate much attention. Yearling weight will be important if you want to ensure finished steers in the appropriate weight range.

It should also be kept in mind that reaction to selection can differ from trait to trait. This is because some traits have higher heritability than others, and are more easily passed to offspring. For instance growth traits such as weaning weight respond faster to selection, than reproductive traits such as age at first calving.

A balance of traits is required, and the perfect balance for you will depend on your climate, nutritional and economic environment, as well as the management goals you have set for your herd.

One way to select for several traits is to set minimum and maximum acceptable levels for each trait, and then choose sires that meet the criteria. Another method would be to rank all sires on each trait, then develop a weighted index which ranks each bull from one (most desirable) to five (least desirable) for each trait.

A Sample Sire Summary Evaluation

Bull	Calving Ease (CE)		Birth Weight (BW)		Weaning Weight (WW)		Yearling Weight (YW)		Milk (MM)	
	EPD	ACC	EPD	ACC	EPD	ACC	EPD	ACC	EPD	ACC
A	-5.70	0.77	6.60	.75	31.3	.75	39.5	.68	-5.60	.58
B	4.2	0.8	0.1	.82	14.6	.83	24.6	.80	6.0	.73
C	1.6	0.87	0.0	.89	0.3	.89	11.1	0.88	18.9	.87
D	6.0	0.88	-5.9	0.87	-3.8	.87	-14.4	.86	10.3	.85

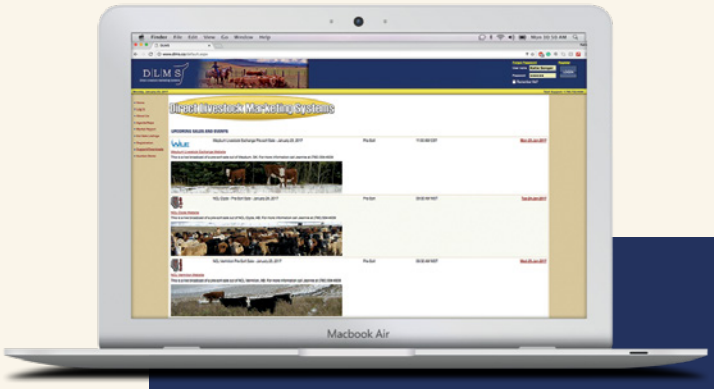

Producer 1 is looking for a sire that can be used on heifers; he wants a bull that will produce low birth weights and he wants to keep some heifer calves as replacements. Growth performance is not his first priority. The sire that fits his needs is sire D. He has a low birth weight EPD and above-average milk EPD.

Producer 2 has a sound breeding program; he is looking for a sire that will maintain performance and milking ability. He will select a bull that will increase growth performance and milk while maintaining calving ease. Sire B is his choice.

Producer 3 has a herd of above-average-frame cows and is not planning on keeping heifers as replacements. She is looking for a bull that will give her the most profit at weaning. Sire A will give her the best result in weaning weight. If heifers are kept as replacements, they will, on average, be inferior for maternal milk.

Producer 4 wants to maintain his calving performance and growth performance but would like to increase the milking ability in his females. Sire C is his choice.

TERMS & CONDITIONS

Bidding: Each animal will be sold to the highest bidder whenever there are two or more bids. The auctioneer will settle any disputes.

Terms of Sale: Terms of sale are cash or cheque at par payable to the clerk of the sale on sale day. No release will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for which payments have not been received prior to departure times unless prior arrangements have been made.

Breeders Guarantee: Aspen Hill Angus and Heart Valley Angus guarantee that all bulls in the sale have passed a breeding soundness evaluation conducted by a certified veterinarian. All bulls present have passed semen tests. All bulls are guaranteed to be breeders. Any complaints regarding breeding difficulties must be reported by the buyer to the seller within 6 months of the sale date. Any animal returned must be free from disease and in good health as we will not provide replacement or adjustment for physical injury or mismanagement. The seller, at his option, may either return the purchase price to the buyer or replace the animal with another of equal quality in full settlement and satisfaction of all claims. No credit values will be extended to future sales. Two year olds guaranteed for no more than 25 females. We stress the importance of insurance on your bull. At no time shall the seller's liability exceed the purchase price of the bull. In the event of any unlikely dispute, the standard terms and conditions of the Canadian Angus Association will apply.

Insurance: All Animals are the property of the buyer as soon as sold. Insurance will be available on sale day. Aspen Hill Angus and Heart Valley Angus are not responsible for injury or loss once the bull has been sold.

Announcements: Any announcements from the block take priority over catalogued material.

Disputes: In case of dispute, bidding will be reopened between parties involved. If no further bid is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision will be final.

Health Status: All Aspen Hill/Heart Valley Angus bulls have been vaccinated with Express 5 modified live vaccine and also with Tasvax 8 vaccine which includes vaccine for Blackleg. They have all been treated for parasites.

For Bulls not picked up on sale day: If animals are to be kept at the colony after the sale, they must be paid for in full immediately after the sale unless previous arrangements have been made. Bull will be kept free of charge until the end of April. If you need to leave your animals behind for any longer, please make arrangements. A charge of $3.00 per day will apply. We strongly encourage buyers to insure their purchases. We will manage them the same way after the sale as before the sale. We cannot be held responsible for purchases because accidents do happen. A $100 discount per animal will apply if taken home sale day.

DAM OF RED HEART VALLEY STOUT 17A

RED HEART VALLEY STOUT 17A

Stout 17A has produced the most uniform and correct calves we have raised so far. For the last two years, his sons have been very well received by our customers and I'm not expecting any less this year as he again has sired some of the very best in this sale. In the last two years, Stout 17A has sold 12 sons over $7000 for an average of $10,125 with a high seller of $13,250. His daughters have great udders and are doing a very good job for us.

Red Flying K Max 21Z is a bull just loaded with goodness. We bought him from Flying K a few years back and the daughters are very feminine with as close to perfect udders as you can find any where. His sons have a bit smaller frame but are full of meat and are very correct.

Stout 38C is a home raised sire that we selected to use. As I said in the sales notes, these guys do work very well and hard. Check out his offspring in this sale, they are very good and very uniform.

MAXIMIZE YOUR PROFITS WITH SUPERIOR PERFORMANCE SIRES

SELLING BY PRIVATE TREATY

JORDON 69B

ATKINSON 442Z

AN OUTSTANDING SELECTION OF VERY UNIFORM, QUALITY SUFFOLK AND DORSET YEARLING RAMS!

Atkinson 431Z is a very thick-set, well muscled ram from the famous Atkinson International out of New Lowell, On. They are Quality Genetics, as they ship breeding stock far and wide!

Jordon 69B, also a very thick, meaty ram from Jordan Livestock of Rimbey, AB. Jordan Livestock had the high selling ram lamb at the Genetic Impact Sale in Westlock in 2017 for $2650! They also had the high selling ewe for $1225! This ram is out of the same kind of Genetics!

Atkinson 442Z, here again, this ram shows why these guys are so renowned for their Genetics! Good muscling plus fast growth rate!

The Dorsets had an average daily gain of .73 lbs/day and a 60-day average of 54 lbs per head! The Suffolks had an average daily gain of .81 lbs/day and a 60-day average of an impressive 60 lbs!

-1.9	38	64	20	39	0.75	10	8

We are pleased to start this sale with a Stout 17A son as they are doing an incredible job for a lot of our customers. Heart Valley Stout 3E is one of the top bulls in this sale and I'm very proud to start the sale with him. 70 lb birth weight and a 110 weaning index and to keep on growing and achieve a 106 yearling index is very impressive and from a heifer to top it off. Considering these bulls are indexed against each other in one group, this guy won't be lonely on sale day.

USE ON HEIFERS AND COWS.

Great all-around bull. Right Answer 10E is a great example of the kind of product that his sire Right Answer 9Y has been producing. These guys have loads of muscle and perform very well, there are 8 sons in this offering and all are very correct with above average performance. Will be very hard to miss this group in the barn.

USE ON HEIFERS AND COWS.

SOUND. SOLID. WELL-TRAINED RANCH HORSES

WE'RE RAISING THE KIND OF HORSES WE WOULD LIKE TO BUY

All of our horses start with the best bloodlines that we know of like Doc Bar, Shining Sparks, Smart Little Lena, Doc O'lena – just to mention a few!

These horses are raised the natural way. They are all handled as foals, and keep getting attention until they are started as two year olds. From there, we don't force them to do things. We make the right things possible and the wrong things difficult.

By the time they are four, they are willing partners and that's when we recommend you buy them.

They are for sale by private treaty. We offer a full year satisfaction guaranteed or your money back.

SELLING BY PRIVATE TREATY

RED HEART VALLEY MAX 13E

HVE 13E • #1972350
BORN MARCH 20 2017

LOT 13

As we have mentioned, these bulls sell in catalogue order and are catalogued in the order they were born. Max 13E is a great example of the kind of sons Max 21Z has been producing with 7 sons selling in this sale. On average, these guys are a bit smaller in frame and are loaded with muscle. 72 lb birth weight and above average gains for weaning and yearling. Great job and great bull.

Use on heifers and cows.

Max 20E is another great example of the Max 21Z sons. Low birth weight and with the smaller frame has above average performance. I would suggest that you stop in on Wednesday night for a viewing of these bulls. These guys have tops like pool tables, exceptional muscling and very smooth bone structure. Great calving ease without sacrificing anything at weaning. His dam's Shockawe 56Z son sold for $13000 in 2017.

USE ON HEIFERS AND COWS.

Sport 24E is the first son of Red Heart Valley Stout 38C to sell and not a bad one at that. There are 5 of them in this sale and at picture time they were very easy to like. Sport 24E did an awesome job starting with a 70 lb birth weight and has a 730 lb 205 day weight and 1157 lb 365 day weight which indexed him at 115 for weaning. This made him the #8 high indexing bull. Not a bad job at all to have started with a 70 lb birth weight.

USE ON HEIFERS AND COWS.

Floodgate 52E is a maternal brother to our Right Answer 9Y bull. Queen Gem 7W has done a great job for us and still is. These Floodgate 76C sons are, on average, a full frame score bigger than the rest. If you are looking for a black bull to breed cows, look no further. There are 10 of these bad boys in this sale. These guys will be well worth the drive. A bit higher birth weight with exceptional growth.

USE ON COWS.

RED HEART VALLEY KING MAKER 53E

LOT 53

HVE 53E • #1972382
BORN MARCH 30 2017

King Maker 53E is a smaller framed bull. These guys are very correct and are just loaded with muscles with incredible tops. We all know where the best meat cuts come from. Use these guys on heifers or larger framed cows and you will be very impressed with the results. Animals that finish faster, grade better and yield higher and that is money in your pocket.

Use on heifers and cows.

AH 90E • #1969557
BORN APRIL 05 2017

Floodgate 90E is a very impressive looking machine. He has the highest birthweight in this sale at 112 lb but with that kind of length comes weight but in the right places. I always say if you are going to have bigger birthweight, you better grow better as well and these are doing it. 2nd highest yearling index at index at 125.

Use on cows.

Floodgate 141E is another great Floodgate 76C son. These guys as a group are very impressive and 141E would be in the top end of them. Great gains, incredible length and thickness. We have used Floodgate 76C on some heifers without any problems but I feel that this guy is best suited for use on cows.

USE ON COWS.

Stout 150E is another great 17A son. I never get tired of selling these guys. Unfortunately, we lost 17A to an injury last year. Great calving ease, great performance and very correct structure. Great group of bulls right here.

USE ON HEIFERS AND COWS.

Right Answer 151E is an above average bull with a great calving ease birth weight. It is nice to see some of these younger bulls in this sale do as well as the older ones. One great thing about doing our catalogue is birth order and selling in catalogue order, is some of the best bulls don't sell until the end. Another reason to stop by prior to the sale to do some homework.

USE ON HEIFERS AND COWS.

ASPEN HILL FLOODGATE 152E

AH 152E • #1969571
BORN APRIL 27 2017

Floodgate 152E is another younger bull that could have started this sale. #1 indexing bull in the sale for weaning weight at 121 and #8 indexing bull at 117 for his yearling weight. The kind of bull that will increase your bottom line.

Use on cows.

Stout 153E is another bull towards the end of the sale that could sure have started our sale with no problem. His full brother topped our red bull line up last year at $13000 to Dwajo Angus and Wayne Branden. These guys are worth checking out for sure whether you are a purebred breeder or running a commercial operation.

USE ON HEIFERS AND COWS.

HEART VALLEY FLOODGATE 159E

HVE 159E • #1972447
BORN MAY 07 2017

Floodgate 159E is the last black bull in this sale and not a bad one at that. B now about all I can say is I hope you come and join us for a couple of great days of socializing and making sure your bull needs are looked after.

Use on cows.

RED HEART VALLEY MAX 162E

HVE 162E • #1972448
BORN MAY 08 2017

Max 162E is the second youngest bull in this sale and has done a great job. These Max are a bit smaller frame than some in this sale but they still manage to compete with incredible muscling and density.

Use on heifers and cows.

RED HEART VALLEY SPORT 170E

HVE 170E • #1972454
BORN MAY 25 2017

Sport 17E is the youngest in the sale and has done a very good job as these younger bulls have to compete against older bulls for everything every day. Great job. Many of the best sires we've used are represented in these guys. Great pedigree, great maternal strength.

Use on heifers and cows.
