Welcome

Welcome to the 9th Annual Remitall Farms Bull and Select Female Sale. While most things in 2020 were uncertain, unpredictable and inconsistent, most things here at Remitall Farms have stayed the same. We continue to strive to produce elite quality genetics for our customers.

We are extremely excited about this group of bulls. Each year we say it's our most consistent group of bulls on offer but I'm most certain that this 2021 bull sale line up could be our most consistent group of young herdsires we have ever produced. We have new sire groups on offer and they have definitely surpassed all expectations. Calving ease sires such as Rainfall, Expertise, Oklahoma and Stunner have given us low birth weight bulls with rapid growth, sound structure with strong maternal traits. Exciting sire groups by Decisive, President, Firebrand, Renovation, Payweight, Ten X 44E and Homegrown have produced bulls with performance and growth, muscle and mass while having strong maternal value. We have a special sale offering by our young herdsires, Spitfire 145F and Renown 312F. In just their first calf crops they have exceeded our expectations.

New and exciting this year is our group of extra age bulls. Many are sired by our performance leader herdsire, Cavalry 180C, who is producing sons with muscle and carcass and daughters who are sound and functional with impeccable udders. These bulls have that extra maturity and size and will be able to cover a large group of cows or heifers with ease. These bulls are sound and athletic with great temperaments.

We also have an outstanding set of two year old bulls on offer. These bulls are not the left-overs from last year. We had used a few of them as service sires in our own program and many, because of their age, were held back for this occasion. These bulls have been raised and grown on a large pasture keeping in mind longevity. They have not been pampered and no feet have been trimmed.

All of our bulls will sell with a complete set of actual carcass and performance records documenting their actual and genetic potential. Bulls will also sell with a full semen evaluation and will be fully guaranteed for the customer.

In addition to the bulls, we have an outstanding group of purebred Angus heifers on offer. Whether you are looking for a show heifer, a group to build a herd around or that special heifer to be a foundation female, we have the right one for you. We believe these are all heifers with phenotype and genetic merit to be top producing females. Prior to the sale, all heifers will be examined by an accredited veterinarian for any abnormalities.

Please note we are once again offering a volume discount on bulls. As well, if you pick your bull or heifer up with in one week we will give cash back on your purchase.

If you have any questions or would like to view cattle prior to sale, you are more than welcome. Just give us a call and we can accommodate you. Due to the uncertainty of what the health restrictions will be on sale day we do strongly encourage you to come ahead of time to view cattle if at all possible.

Our customers' health and safety are of our utmost concern. We will be following all AHS regulations that are in place at the time of the sale.

If you cannot make it sale day please feel free to call us here at Remitall Farms or any of the sale staff listed. We will assist you in any questions you may have. Internet bidding will also be available sale day through DLMS at www.dlms.ca. All bulls and heifers will be available to view on our website at www.remitall.ca.

We look forward to seeing you!

Gary & Jacci Richard and Kelly

Right to Semen: Remitall reserves the right to collect semen on any bull sold through this sale. The semen collection will be at Remitall's expense and the buyer's convenience. Any semen collected will be for Remitall Farms' in herd use only.

Bull Delivery: Free delivery will be provided by Remitall Farms on bulls and heifers to central points in Western Canada at the convenience of Remitall Farms, unless previous arrangements have been made. We will assist in arranging delivery and cost share to Ontario, Quebec, Maritimes and US destinations. Sale bulls and heifers will be available to be loaded out sale day. $100 off per bull and $50 off per heifer if picked up within one week of sale.

Volume Discount: A volume discount will be applied to multiple purchases on bulls only. 3 Bulls- 3% off, 4 Bulls- 4% off, 5 Bulls- 5% off, 6 Bulls 6% off, 7 Bulls-7% off, 8 Bulls-8% off, 9 Bulls- 9% off, 10 + Bulls -10%

Guarantee: Bulls are breeders if they can settle cow by natural service and pass a fertility semen test by a competent veterinarian.
In order to better assist you in an event of any problems occurring with a bull, it should be reported to us as soon as possible and not later than the current year in which the bull was purchased.
Remitall Farms will replace the bulls considered non breeders with a bull of equal value agreed upon by both parties or will refund the purchase price of said bull.
Remitall Farms is not liable for bull lost due to death or injury. Due to the different conditions and management practises under which bulls are run, Remitall cannot guarantee the number of cows a bull will settle. Under no circumstances is Remitall responsible for any further losses the purchaser may claim to have incurred.
Remitall Farms reserves the right to have the purchaser return any bulls considered non breeders to Remitall for examination.

Herd Health: Remitall is a Brucellosis free area. The bulls are vaccinated in June and again in September with Bovishield Gold 5, Ultrabac 7/ Somubac, One Shot. Bulls are treated with Ivomec pour-on late October and again early January.

Bull Management: The Sale Bulls and their dams are managed in large groups throughout the summer with no creep. The bulls are weaned mid September and after 3-5 days in corral are turned back out on an 80 acre pasture with lots of exercise, clean water and free choice hay. Bulls are eventually introduced to a TMR (Total Mixed Ration), consisting of oats/barley silage, chopped hay and a low % grain (oats/barley)ration. Late October bulls are moved into corral pens for better management from cold weather with lots of bedding enabling them to stay clean. Bulls are fed a TMR (Total Mixed Ration) for growth and gainability but keeping in mind longevity and fertility.

It's a privilege to continue to work with the Latimer Family on their nutritional program. When you think of Remitall Cattle, the first thing that comes to mind is quality. Remitall genetics are a staple in the seedstock industry and around the world. A family operation through and through, three generations of Latimer's focus on building the Remitall brand every day.

You can rest assured you are investing in a program that has withstood the test of time. Organic minerals are used to ensure proper immune function and overall bull health. The comprehensive nutritional health and development of the bulls and the cow herd are of utmost importance and are continually tweaked to meet environmental and seasonal conditions.
