Welcome

TO OUR 15TH ANNUAL SPRING BULL SALE!

We welcome any of you, new to our program for the first time and THANK YOU to all of our repeat customers for your purchases in our past sales and your continuous support in our program, without all of you, 66 Ranch Ltd would not be what it is today. A real ranch run purebred herd.

For any of you not familiar with our program, we do make our cows work for themselves around here. Our cows are expected to forage for themselves well into the winter months, even into February in some cases, weather depending of course. Our idea around here is "good cows raise good calves" we are extremely particular about our mother cows' udder quality, it is of upmost importance with our cows calving in later April and May on green grass. Udder support & teat size is very important with a cow on green grass with a 80-85 lb calf sucking on her, you will recognize quickly how important those two things are on udder quality. We breed our purebred herd in 2 cycles, one cycle of A.I. and one cycle of walking bulls, so she has to be fertile to stay around here. Our cows are expected to travel distances in certain times and February the cows need to be moderate and easy keeping to maintain body condition while foraging on sometimes poorer stockpiled grass.

For any of you that are unaware, last winter we purchased the entire purebred cow herd from Valley Blossom Ranch, Beau and Ashley Switzer, from just south of Swift Current, Saskatchewan. The opportunity presented itself late in the fall of 2024 and in early 2025 we made an agreement with Beau & Ashley to purchase their cow herd, and they agreed to calve their cows out for us, being they were February calving cows. We received the pairs and their open heifer calves in late April. (We bred the cows this past year to start calving mid April along side the rest of our herd!) We felt their herd would complement our herd and fit right in, these cows of theirs are real ranch cows as well. Beau & Ashley run their purebred cows in as similar of a fashion as ours do. Beau, over the years of conversation with him, has always talked of foot quality. This set of cows is possibly one of the strongest footed set of purebred cows we have run across. We really want to thank Beau & Ashley for the opportunity to purchase their herd, and for the most "classy" cow purchase we have been involved in. They calved and managed these cows last spring like they had never even sold them. We are so grateful to have great friends like these people!

So, with all of that being said, we will have to offer this spring approximately 70 more yearling bulls in our sale offering than past years. These 70 extra bulls will obviously have more age than our other 95'ish yearling bulls, being born starting in February. We feel that these 70 February/March born calves will complement our other yearlings with a little more age, come breeding season for most of our commercial customers the bulls will be nearing 17 months of age. We will also be offering 40 +/- 2 year old bulls like we always do in our spring sale, being the calves at our place that are born after May 10th.

Please stop in or give us a call anytime prior to the sale with any questions about our offering or any of the dams that have bulls in the sale. We are always happy to talk cows with anybody that cares about cows as much as we do!

Also, please look up our videos on DLMS prior to the sale, we take the time to take pictures of the feet on all bulls offered in our sale, and they are included in the video of each individual lot. If you can not attend our sale at Bow Slope Shipping Association in Brooks, Alberta on April 16th starting at 1:30pm MST sharp, you can view and bid on DLMS, or can contact any of our capable sale staff listed in the front of this catalog. They will all be upfront and honest with you about anything in this offering. Bulls will also be available for viewing at Bow Slope in the afternoon of April 15th.

If you purchase, bid, or just come to view our offering for the first time, please stay after the sale for an amazing Angus steak and a little "Country Hospitality!"

Thanks for your interest in our program!

Kelsey, Malissa, Brett and Carter Campbell

CAN'T MAKE IT ON SALE DAY?

Our sale will be broadcast online @ DLMS.ca

We are pleased to announce that we will have the services of DLMS. This will allow you to bid on the bulls via the internet. Of course, we would rather you attend the sale and our hospitality afterwards, but we well know today's world just keeps getting busier and busier! But, if for some reason you cannot attend, this gives you the opportunity to bid on the bulls at the live auction. Please remember to pre-register at www.dlms.ca 24 hrs. prior to the sale.

We also have available with this service is a live video of every animal in the sale. To view these videos go to our website www.66ranchltd.com and just click on view catalog. Videos are also available at www.dlms.ca. We encourage you if possible to view the cattle at the ranch prior to the sale.

Please contact Mark Shologan at 1-780-699-5082 with any questions or issues with registering for the sale.

PLEASE NOTE:

- All two year olds and yearlings are semen tested
- No bulls have been sold prior to the sale
- Bulls are sold in catalog order
- Updated weights & scrotal measurements will be available sale day
- 66 Ranch reserves the right to draw 250 straws of semen at our expense and at your convenience on any bull selling in the sale. For in-herd use only.

BERRY CREEK VETERINARY SERVICES

The two year old bulls offered for sale by 66 Ranch have all passed a breeding soundness examination and are classified as satisfactory potential breeders.

This year the yearling bulls offered for sale by 66 Ranch have passed a breeding soundness examination and are classified as satisfactory potential breeders. They have scrotal circumference measurements above the minimum requirement recommended by the Society of Theriogenology and Western Canadian Association of Bovine Practitioners.

In my opinion the bulls offered for sale are in excellent health and in ideal body condition.

Sincerely,
Kirby Finkbeiner, DVM

RECOMMENDED HEIFER BULLS

There are probably more than the 82 recommended "Heifer Bulls" at our sale. But we feel confident that the bulls with the **bold print BW** in the catalog will make for trouble free calving off your 1st calf heifers.

PERFORMANCE DATA

- AOD: Age of Dam
- BW: Actual Birth Weight
- 205D: Weaning weight in lbs. adjusted to 205 days
- 365D: Yearling weight in lbs. adjusted to 365 days

EPD EXPLANATION

CE: Calving ease, predicts the ease with which a sire's calves will be born when bred to first-calf heifers. The higher the number, the higher the probability heifers will calve with no assistance.

BW: Birth weight, a prediction of a sire's ability to transmit birth weight to his progeny.

WW: Weaning weight, predictor of a sire's ability to transmit weaning growth to his progeny.

YW: Yearling weight, predictor of a sire's ability to transmit yearling growth to his progeny.

MILK: A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters.

MCE: Maternal calving ease. The higher the number, the higher the probability that daughters will not require assistance at calving time.

Average EPDs for all Black Calves born in 2025
These are the numbers to compare the bulls in the catalog to:

EPDs	CE	BW	WW	YW	MILK	MCE
	+3.3	+2.0	+56	+99	+24	+6.5

EPDs in this catalog are as of March 10/26

Change is inevitable. Thirty years ago, we never imagined a day when we would step back from the purebred industry. When we began discussing the possibility of dispersing the herd, we knew one thing for certain—it would have to be to the right outfit and done in one deal. As it turned out, it became the classiest cow deal of our lives.

The Campbell family were great friends before and throughout the process, and today we are even closer. They truly represent the kind of salt-of-the-earth people this industry is built on.

For the "66" crew to even consider adding our herd alongside theirs is something we view as one of our proudest accomplishments. The 66 Ranch program has always been built around the kind of cattle we believe in—sound, functional ranch cattle that work for a living, last for years, and while carrying the eye appeal we all appreciate.

The set of bulls originating from VBR are bred with the same "cowboy cattle" philosophy that defines the 66 Ranch program: moderate birth weights, structural correctness, muscle, and good feet. These are cattle designed to travel, work in real-world conditions, and sire calves that convert feed into pounds—because when they reach the bunk, pounds are what matter.

We would be more than happy to visit with anyone who has questions about the VBR-bred cattle in this offering and are glad to share any insight on the cattle selling. We can't thank the 66 Ranch crew enough for the respect and professionalism they have shown us throughout this entire process.

All the best on sale day.

BULLS SELL IN CATALOG ORDER

Updated weights & scrotal measurements available Sale Day

WHY WE HOLD OUR SALE LATER IN APRIL

We, along with our veterinarian's advice, believe the yearling bulls will be old enough to semen test prior to the sale. By doing this, hopefully it will make your & our lives easier by the bulls being able to go to their new homes directly after the sale or shortly thereafter.

A bull that sold through our 2023 Spring Sale purchased by Merit Cattle Co. We saw this bull again last spring and thought so much of him that we decided to draw some semen to use in our herd. Incredible foot, muscle expression, great hip and his dam has proven herself here at the ranch, and is heading to our donor pen. Super maternal pedigree, with the growth and performance we all want in the steer pen. Expect to see a lot more progeny here out of 120K. Bull calves average birthweight is 80 lbs. Heifer calves is 75 lbs.

A walking bull purchased at Merit Cattle Co. We fell in love with 1020J for his length of body, muscle pattern and huge middle as well as an incredible hip. All this with a very moderate birthweight. Once again we chose 1020J for all his great qualities but were absolutely convinced to own him with the dam on the bottom of his pedigree, Flora 6078D. We just cannot get enough of the Flora bred females at Merit. Exceptional udder quality from this line. You will want to keep these daughters. Big middled, hairy females with impeccable udders. The kind we are striving to build here at 66 Ranch. Bull calves average birthweight is 82 lbs. Heifers calves is 75 lbs. Owned with Murray Ranches.

CALVING EASE BULLS BW IN **BOLD**

LOOKING FOR LONGEVITY?

A cow at 66 Ranch is under great scrutiny from her first calf and continuing on her entire life at our place. If they show any imperfections with feet, udder or disposition they are culled right there on the spot. Any cow 4 or 5 has been scrutinized pretty thoroughly. So with that being said, we are pretty proud to have 117 cows that raised bulls in this sale being 6 years old and older, all the way up to 16 years old.

DAM PHOTOS

After conversations between Malissa and I over the past couple years, we thought being as we were such a maternal based program people may appreciate seeing some photos of our females in our catalogues. These photos may not be the traditional combed up, blown off "Pretty" pictures most people put in their catalogues. These are pictures of our cows in their working clothes. For any of you that are not completely familiar with our program, we take a photo of all our cows when we tag their newborn calf. This way we can see their bags anytime of the year, and are available to show all of you our cows when their bags are at their fullest, moments after they calve.

A walking bull at the Ranch. We were able to purchase half interest in Investment over the winter of 2024/25. Extremely excited that the great folks at Duralta Farms offered us the opportunity to purchase 1054J so he could walk the pastures at 66 Ranch. A female maker through and through. 1054J is backed by the absolutely beautiful female and herd bull maker, Flora 6078D. I think if you read through our herdsire footnotes you may see a common theme here of this prolific cow Flora 6078D. On the topside of 1054J's pedigree is U2 Coalition 206C, a proven bull backed by another outstanding female U2 Erelite 109Z. You will want to keep all the females that are sired by these 1054J sons, the bred heifers and heifer calves at our place are at the front end of their pens. Bull calves average birthweight is 84 lbs. Heifer calves is 79 lbs. Owned with Murray Ranches.

TWO YEAR OLD SONS SELL AS LOTS 78-79

A big-time performance bull, while being very moderate at birth. His sons will add pounds to your steer calves by the length of spine and depth of body in ROI 163J. This is to be expected by the sire of him, Bar-E-L Stamina 11F. Talking with the Gibson's at Everblack you will want to keep all the heifer calves. Stamina 11F, makes beautiful cows with exceptional udder quality. Bull calves avg. birthweight is 81 lbs. Heifer calves avg. birthweight is 78 lbs.

A moderate birth weight bull with great performance. You will want to retain all the female progeny from his sons. A "who's who" stacked sires amongst his pedigree! HF Tiger 5T, Youngdale Excalibur 32X, the Madame Pride family, Pleasant Valley Lute, TC Freedom 104 and of course HF Miss Blackcap 27R all up in the front of this stud's pedigree! Quite a list of all star female makers!! Bull calves avg. birthweight is 82 lbs. Heifer calves avg. birthweight is 79 lbs.

GOOD COWS RAISE GOOD CALVES!!

What we expect of a cow at 66 Ranch:

- She must calve on time
- She must nurse her calf on her own for her whole life
- She must have proper feet and legs to allow her to travel around our place into her teen years
- She must be able to carry enough flesh throughout the year to be able to graze right until February without added protein (if winter allows it)
- She must be fertile enough to get bred either by 21 days of A.I. and 21 days of a walking bull. She's got 42 days to get bred!
- She must wean a quality calf, if it's a bull calf, needs to be one we can sell to our commercial customers, or a heifer calf, to be quality enough to go to our replacement pen

A walking bull raised at 66 Ranch. What a maternal powerhouse!! Leachman Right Time on top and the dam is one of the best Alliance bred females at the Ranch. Longevity from the Right Time, we have Right Time cows last until 17 years old at our place. The Alliance will give you the perfect udders you are looking for as well as the extreme docility we all like. The neat thing with Alliance bred into the Right Time, is this sire has great scrotal, with that, the fertility will be passed onto his progeny. Bull calves average birthweight is 83 lbs. Heifer calves is 78 lbs.

A walking bull purchased at Merit Cattle Co. Better known around our place as "Ranchwater". Ranchwater stands on a foot as good as you will find. All four feet have toes that are straight as a ruler and he has as much heel under him as you can put on a foot. You will wear out a pickup truck driving around the countryside to try and find a bull with a foot as strong as this bull! He is a sleep all night heifer bull with a dam behind him that fleshes up as easy as you can make one. For a sure fire heifer bull, he sure puts a hip, middle and a topline onto his progeny. The docility of Ranchwater is unmatched. Super excited to implement Ranchwater's genetics going forward in our program! Bull calves average birthweight is 74 lbs. Heifer calves is 70 lbs.

A walking bull at our place purchased from Hoover Angus. We selected this bull for his added growth and his absolutely perfect feet. His dam walked the pastures at Hoover's until the age of 16 years old. They pictured her feet at the age of 14 and they are some of the straightest toes I've laid eyes on. Hoover No Doubt the sire, is also known for having a super strong foot. So if you are wanting to grow big steer calves that weigh up, and are wanting females to be in the herd for a long time, make sure you take a look at the 6H sons on offer. Bull calves birthweight is 83 lbs. Heifer calves is 78 lbs.

A walking bull we purchased from McCumber Angus Ranch. A calving ease bull with a ton of performance. An incredibly beautiful head on this bull, with as much style, rib capacity and ease of flesh as you will find in a herd bull. We purchased this bull because of his maternal greatness, quoted from the footnotes in their catalog "1169 represents well what our program is all about. Stacking as many top cows into the pedigree as possible. It can't get much better than this here." Multiple, multiple donor cows on both the top and bottom side of his pedigree. And the other neat thing is we seen 5 of the 6 cows in the front of 1169's pedigree on the ground at their ranch. Bull calves average birthweight is 83 lbs. Heifer calves is 78 lbs.

A walking bull at the ranch purchased from the super people at Merit Cattle Co. Trent and Janelle Leibreich. We purchased him because he was in our eyes one of the longest, deepest, yet moderate herd bulls in their pen that season. But the determining factor for us deciding to own him was the maternal value he would bring. 6 of the 7 cows on the front of the pedigree were all raised at Merit. Proven, predictable maternal breeding bull here. 32H has and will continue to be bred to some of our top females at our place. Be sure to plan to retain all the heifer calves from 32H, they will be in the replacement pen and in the cow herd for a long time. 32H sires calves with exceptional foot quality. Not unexpected by the foot quality his dam has, as near a perfect foot with exceptional heel as you can find. His dam 6060 has produced many quality herdsires selling to multiple well respected seedstock producers besides Kingpin 32H himself! Bull calves average birthweight is 84 lbs. Heifer calves is 79 lbs.

A walking bull at the ranch purchased from Merit Cattle Co. We selected 2048K for his strong foot quality, moderate type, length, and extreme natural ease of flesh. The power that he passes on, definitely is noticed and coming from his tremendous pedigree, grand dam Merit Socialite 48X. Excellent uddered, gorgeous angus female with the power to build herd bulls! Bull calves avg. birthweight is 88 lbs. Heifer calves avg. birthweight is 75 lbs.

A walking bull at 66 Ranch purchased from Merit Cattle Co. We selected 1001J besides for his amazing growth from birth to weaning to yearling weight, but also because of the maternal power and greatness that raised him, Flora 6078D. She is a mainstay in the donor pen at Merit and we feel she is as ideal of an angus cow as you will find. Picture perfect udder, feminine, moderate, easy fleshing, near perfect footed and doesn't seem to matter what they mate her to she cranks out herd bulls. 1001J's bull calves average birthweight is 87 lbs. Heifer calves is 77 lbs.

A Merit McLaren son we purchased at Duralta Farms. We decided to purchase this great footed sire because of the production record of the dam, and for the quality of cow she is at the age she is. Multiple bulls produced by the dam 48W, walking in purebred herds. Longevity, excellent udder, great footed 14 year old cow in 2023, the year we purchased 158K. Bull calves avg. birthweight is 86 lbs. Heifer calves avg. birthweight is 78 lbs.

A Merit Cattle Co. bred bull we were able to purchase at Mar Mac Farms Dispersal Sale. We fell in love with the progeny we saw by 7035E. The daughters make you drool with big middles, wide tops, hairy and super docile. The bulls look like bulls should, crested necks, big hipped, big middles, big nuts and great feet. We are very pleased with the 7035E sire group. Bull calves average birthweight 85 lbs. Heifer calves 80 lbs.

A walking bull at our place purchased from Merit Cattle Co. We purchased this bull for his super strong maternal pedigree. Insight, Range Boss, Tiger on the topside. Countess, Rosebud, Flora on the bottom side. Dam Countess 8114F had a very good grade from me when touring the Merit cow herd. The paternal sire's dam is once again Flora 6078D. There will be no surprises of what the female progeny will look like with all these great females stacked in 2047K's pedigree. The bulls off of 2047K are all stamped the same, soft made, soggy middle, big topped, big hipped, hairy, good headed bulls. Take a good look at this sire group! Bull calves average birthweight is 86 lbs. Heifer calves is 76 lbs.

WHAT CUSTOMERS HAVE TO SAY ABOUT OUR BULLS

Back in 2011 we approached Chuck, Kelsey and Malissa about building up our herd with 66 Ranch Angus genetics. With ranch perspective, they understood and respected our long-term plan. We calve out in 12-14 section fields with rough terrain, so we needed bulls that could produce easy calving cows, and have strong maternal instincts. Our bull battery of 55-60 exclusive 66 Ranch genetics gets fresh bulls added every year, and it's not uncommon to have 5 or more 6 year old bulls still viable and working.

When planning the new bull purchases, we try to stick to about 4 to 5 family groups using half-brothers to help bring uniformity. The evidence shows each fall during weaning when large groups of balanced uniform steers and heifers are put in pens ready for sale or feed. 66 Ranch does an amazing job of staying ahead of genetic selection by planning years in advance. The bulls are easy to work with, they have great feet, travel well, are easy keepers, who cover the cows in tough conditions, and their longevity is valuable. The cow herd has also benefited from the genetics with many cows well over 10 years of age still producing, that still have great feet and udders.

We are so thankful and respectful of the guidance and working relationship with Kelsey and Malissa, who's top-notch bull program continues to improve our cow herd every year.

Sincerely,

Rafter 7 Ranches Ltd.

Tim, Christina, Jesse, Joc & Brielle Christianson

(185 bulls)

Carolside Ranching would like to express our sincere gratitude and appreciation for the incredible level of service we have received from Kelsey and Malissa (66 Ranch).

The bulls we have purchased from 66 have had a huge positive impact on our herd.

Sincerely,

Brad Slorstead

Plain and simple, 17Z has it all. Performance, ease of flesh, leg structure, super foot, free moving, maternal. We feel we have lucked out and finally raised one that can compete with any A.I sire. His heifer calves are extremely feminine and by far the top end of the pen. Very moderate birth weights out of 488 calves, 86 lbs. avg. on the bull calves and 78 lbs. avg. on the heifer calves. We find it much easier to have confidence in A.I.'ing to a bull that you know exactly what his sire is and as well his dam. Because they both came from our program.

Deep ribbed and huge capacity with growth and thickness along with incredible docility. Super hair coat. A proven herd bull maker in the "Sewall" herd. And many of his daughters producing offspring at 66 Ranch. As time goes by, we have realized the absolute gorgeous females 14W has given us. We are using him back again at our place by A.I. to create more spectacular uddered, big middle, feminine females! Bull calves average birthweight is 85 lbs. Heifer calves is 75 lbs.

A walking bull at the ranch sourced from Merit Cattle Co. We purchased "Cool" 3028L as a calving ease sire to use on our 1st calf heifers while adding performance. Cool has that extra length of spine with a powerful hip and very deep flanked for a legit heifer bull. The other thing we really admired about him was his early maturity, that definitely adds to his high libido. We have never seen a yearling bull be such an aggressive breeder. He would literally push the heifers with his shoulder into position and be on top of them and have the job done before you could blink your eyes! Super sound footed, hairy, docile, big nutted. The cow family behind him on the bottom side of his pedigree was the determining factor for us to make sure we owned him. His absolutely gorgeous dam 1004J is a daughter of the once again, "one of the best cows we have found to date", Flora 6078D! Bull calves avg. birthweight is 72 lbs. Heifer calves avg. birthweight is 66 lbs.

A bull bred by Miller Wilson Angus and is co-owned with Arda Farms/Freeway Angus. We were fortunate enough to be able to purchase semen on this bull from the super people who own him. With a bull having as much shape, hip, and fore rib to him that stood on a foot with heel like no other, we were convinced we needed to use him. Going back to the Miss Essence cow family at Miller Wilson, the females will be tanky, hairy and correct with exceptional udder quality! Bull calves avg. birthweight 89 lbs. Heifer calves avg. birthweight is 81 lbs.

A walking bull at the ranch acquired from Merit Cattle Co. at their 2024 Annual Bull Sale. We selected 3023L not only for the amount of power he carries through his top, big middled, added bone, and absolutely astounding feet, but for the 2 powerful cows close up in his pedigree. Once again the no miss dam Flora 6078D, and the power cow that stands on such a near perfect foot that you wished all cows did, Merit Blackclass 6060D. Blackclass 6060D is no stranger to raising herd sires, McClaren 8020, Lawman 2029, Sheriff 2040, and the herd bull that walked the pastures at our place Kingpin 32H! Expect 3023L to raise top end steers for sale day, and so many powerful cows weaved into his pedigree, there sure won't be many heifer calves that won't be in the replacement pen. Bull Calves avg. birthweight is 82 lbs. Heifer calves avg. birthweight is 80 lbs.

A walking bull at the ranch purchased from the great people at Merit Cattle Co. A big hiped, deep bodied, super hairy No Doubt son. We once again were convinced to own 3111L because of the dam on the bottom side, Flora 6078D strikes again. One of the most complete, balanced, and productive angus cows we have come across. Heifer calves heading to the replacement pen again! Bull calves avg. birthweight is 81 lbs. Heifer calves avg. birthweight is 76 lbs.

A herd bull that was sold to Valley Blossom Ranch that we purchased back when we purchased their entire herd Spring 2025. A Kingpin son with added performance that stands on an incredible foot just like all the Kingpin progeny. Super cows backing up CKM 144L, the heifer calves will all be the keeping kind, moderate, easy fleshing, tanky with exceptional udder quality. Bull calves avg. birthweight is 85 lbs. Heifer calves avg. birthweight is 78 lbs.

A herd bull that was sold to Valley Blossom Ranch that we purchased back when we purchased their entire herd Spring 2025. A Kingpin sired bull out of an absolutely exceptional "1D" daughter and a grandam by "17Z" that is possibly one of his best daughters! 473K will sire moderate cattle that will outweigh his competition by adding the middle, top, and a hind end that will make order buyers get out of their chairs when your steers enter the ring! The female side of this stud will be nothing except, exceptional! Bull calves avg. birthweight is 80 lbs. Heifer calves avg. birthweight is 78 lbs.

A walking bull at the ranch purchased from the great people at Hamilton Farms. 102L was our selection at their 2024 sale for a bull to walk on our open heifers. He is a real calving ease sire with big time growth. Besides being a "true blue" heifer bull, he was big nutted and had a manly character and presence about him. The other reason we chose him, was for the grandam in his pedigree on the bottom side, Evening Tinge 118Z. A picture perfect Angus cow with a production record you can only dream about! Her daughter 149J is well on her way to have the production record of her dam as well, after raising a stud like 102L! Bull calves avg. birthweight is 71 lbs. Heifer calves avg. birthweight is 67 lbs.

A walking bull at the ranch acquired from the Leibreich's at Merit Cattle Co. We absolutely love this moderate birth herd bull. He is deep sided, long spined, and always packing extra flesh. He is a full brother to the one and only "Merit Socialite 1028J". That year when I was looking through the bull pen, Trent said, "you have to come see this heifer calf", that being 1028J. Well, I absolutely loved her and thought if we can't own her, we needed to own her full brother! So many quality females in this stud's pedigree, keep all the daughters!! Bull calves avg. birthweight is 82 lbs. Heifer calves avg. birthweight is 71 lbs.

A moderate birthweight bull with added performance. A little more frame coming from the Natural Law 52Y, but the performance to back it up. The dam a Paradigm bred daughter, along with Magnolia and PM Blossom cows on the top side of the pedigree, the females will be keepers. This in turn will create steer calves that will weigh up and heifer calves kept back as replacements! Bull calves avg. birthweight is 83 lbs. Heifer calves avg. birthweight is 80 lbs.

An extremely deep sided walking bull purchased from Hamilton Farms. We selected him for his calving ease and extremely good performance. His dam is a favorite at Hamilton's, a moderate framed cow with an excellent level udder. We sadly lost 135G through the winter of 2021 to an injury, fortunately though we have semen in the tank to utilize his genetics for years to come. Bull calves average birthweight is 80 lbs. Heifer calves is 75 lbs.

An A.I. sire we chose to use for his moderate birthweight and yet have the power to grow well into weaning and right until they are hanging on a rail. Cowboy Up progeny are known for their strong foot structure. Maternally, is a very positive thing as well, an Upward 307R on the bottom side of the pedigree are going to give you good footed, super uddered, feminine females. Bull calves average birthweight is 82 lbs. Heifer calves is 80 lbs.

A walking bull purchased from Merit Cattle Co. that now struts his stuff around the ranch! 3088L has 2 extra ribs for length, as deep flanked and big middled as any bull we have found to date. Super disposition, excellent footed, hairy, big nuted, has that ease of flesh for sure, not many holes in this herd sire. 3088L's sire is Merit Intent 37H, the dam

3088L FEET

there once again is Flora 6078D. She just cranks out herd bull after herd bull! 3088L's steer calves will definitely push the scales down, and the daughters will be in the keeper pen. Maternal and performance in this one! Bull calves avg. weight is 86 lbs. Heifer calves avg. birthweight is 80 lbs.

A walking bull purchased from Merit Cattle Co. for his moderate birthweight with great growth to use on our first calf heifers. His sire Thunderstorm 807F has an outstanding foot under him with a tremendous amount of heel. His dam Flora 6078D is as ideal of an Angus cow as you will find. Impeccable udder. Expect the calves to come easy and grow. And as well, plan to retain the daughters, they will be the kind that will be around a long time!

DAM: MERIT FLORA 6078D

Bull calves average birthweight is 76 lbs. Heifer calves is 72 lbs.
