# 32nd annual BULL SALE

SATURDAY APRIL 11, 2026

BATHO FARMS LTD.

Video Sale starts at 1:00 PM

Viewing of bulls in morning at Batho Farms

## WELCOME!

Welcome to our 32nd Annual Southwest Bull Development Centre sale. A little over 32 years ago a group of progressive breeders gathered at Melita one evening and discussed the idea of starting this development centre. Some of those breeders have moved on, both with their own sales or dispersed their herds. But one thing that has not changed is that the Development Centre is still located at Oak Lake. The bulls are fed in a large area allowing lots of exercise to grow and develop. The ration of 50% Grass/alfalfa hay, 47.5% oats, 2.5% supplement in a self-feeder, and is designed for a gain of 3lbs./day.

All the bulls have passed a semen evaluation before the sale.

The sale is at Batho Farms Ltd. and online at DLMS.ca. The bulls have been videoed in mid March and clips of each bull will be presented during the sale. We encourage everyone to come at anytime to view bulls at the development centre before the sale.

If you have any questions or are unable to attend the sale and would like to discuss the bulls feel free to call Albert, Jay, Levi or any of the consignors listed in the sale catalogue.

*Michelle Rimke*

Southwest Bull Development Centre

## CONSIGNORS

### Batho Farms Ltd.

Oak Lake, MB

These are the first sons to sell out of our new herd sire acquired from the Williams family at Holloway Angus. We purchased him with our friends at Batho Farms; the calves come easy and we have been extremely happy with how they have developed. 2N is a stylish, powerful looking bull who catches your eye the moment you walk into the pen. His dam 24G is moderate in size with excellent feet and udder structure. We have retained three daughters in our herd.

The sire of lots 17-20 is a home-raised Rainfall son we chose to keep for ourselves. We think quite highly of this sire and the stamp he has left on his calves so far. The sons are good but after calving out his first set of daughters they are even better! 3N is splitting image of his sire. Tons of length, deep ribbed, with docility to match. The dam, 37G is moderate framed with tremendous udder structure and teat size. Two daughters have been retained in herd.

20N is a powerful son of S A V Rainfall 6846 backed by the productive Penny cow family. This bull offers an excellent blend of calving ease and performance with a 0.8 BW and 103 YW EPD, making him a versatile option for many breeding programs. Posting an impressive 3.73 ADG on test, Nelson has the kind of natural growth and muscle that will add pounds and performance to a calf crop. A stout, big-bodied herd sire prospect with the genetics to move programs forward.

44N is a long-bodied, well-balanced son of Chester 99J that offers a strong combination of performance and maternal strength. Backed by the productive Karen cow family, this bull brings together growth, capacity and a practical herd bull look. His solid performance and strong maternal background make him a great option for cattlemen looking to add pounds while maintaining productive females. A rugged, functional bull that will work in a wide range of programs.

Lot 31 is a standout herd bull prospect that immediately grabs your attention with his powerful, balanced phenotype. Nikon is deep bodied, big topped, and stout made with plenty of natural muscle and dimension, yet still maintains the smooth shoulder and attractive look that today's cattlemen appreciate. He travels freely on a strong foot and leg and carries himself with the presence and herd bull character you want to see. Backed by the proven Hi-Country influence and a productive Catherine cow family, this is a bull built with the kind of look and structure that works in both purebred and commercial programs.

Large framed, long bodied herd bull sure to add some presence to any calf crop. Eye catching from day one, he has yet to disappoint. His dam is one of the most productive cows on the farm with 2 previous bulls selling at Southwest.

**ADDITIONAL INFO**

**RATION:** The Southwest Bulls have been fed a complete ration that has been prepared and processed at Batho Farms Ltd.

It consists of the following ingredients:

- Roughage (grass/alfalfa hay) 50%
- Oats 47.5%
- Supplements 2.5%

The ingredients in the TMR ration are all added by weight and this ration is self fed to the bulls. The ration is designed for the bulls to gain 3 lbs/head/day.

**SEMEN TEST:** All bulls will be semen evaluated and have passed semen evaluation. Semen Test Information will be on an added sheet on sale day or can be requested earlier.
